Ct+ -> std:: pair </ri>
java fr. util. laur

2) struct x x

(3) Tuples

data structure consisting of multiple parts.

France of these trues of these traces of the traces of th

can hold multiple values & three values may er may not be related to each other

Eg: [riya, 123, "2#"]

Java Tuples -> Java librory

Java Tuples allors marénun of 10 taples.

Print the subsequences of a string.

"abc"

abc"

abc"

→ ac → ab-c → ab-c → Recursive Call

Cet work 

ab C

Bigger problem

subsequence (smaller problem)

be

color be

Q Permutations

S abe

abc

a

output -> [abc, alt, cab, cba,

bac, bca]

la b c b c b c a c b c a c b c a c b c a b

Keypad Combinations
